

PRAXIS II for Elementary Education: Mathematics Study Guide/Suggestions

1. **First** go to the ETS website to view specifics about the Math portion:

<https://www.ets.org/praxis>

Be sure to reference the correct test: Praxis II (5001) or (5003)

2. Can you use a calculator? When/where is the test offered? What math topics will be in the test? How many questions on the test? How many minutes allowed for the test? Will there be statistics questions? (Yes)

- You MUST go to the ETS website to answer these essential questions –
- There are math practice problems on the ETS website (but only 13 questions).

3. The best book I have found for practice is: “Praxis II for Elementary Teachers” ISBN -13-978-0-7386-0913-3. It can be purchased on Amazon for less than \$10:

<https://www.amazon.com/Praxis-Elementary-Education-Knowledge-Certification/dp/0738609137>

This book has study guides for ALL 4 content areas.

There are other books out there but most have content/quality problems

4. The book above contains sample math PRAXIS questions
5. Before you solve practice problems, determine how many minutes/seconds you have per problem using test information from the ETS website.

6. Solve the problems in groups (maybe 5 at a time, **then** check answers).

Below are online resources for Math Help:

Basic math definitions and explanations:

<http://www.pinkmonkey.com/core/MathPreAlg.asp>

Online free Test Problems:

(1) <http://www.teacherstestprep.com/>

Teachersprepteachers requires you to create free account and gives 50 excellent practice problems. However, no answers are provided as they seek \$\$ for use of thorough test materials.

(2) <https://www.testprepreview.com/modules/mathematics1.htm>

Good 40 practice problems with answers. All problems may not match Praxis test questions.
